Dear Mr. Weidmark,

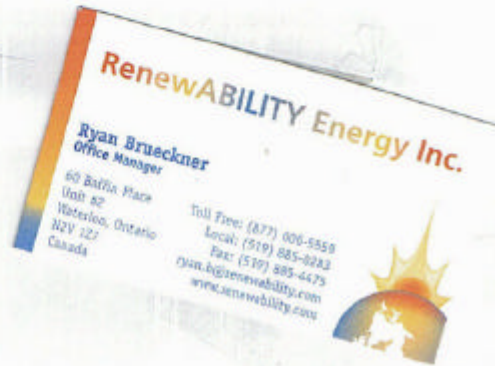

Thank you for your recent order of a Power-Pipe from RenewABILITY Energy. We are pleased with your interest in our product and look forward to shipping your unit shortly.

Before we do so, we would like to confirm your contact information. We have attempted to contact you by e-mail and by phone, but have been unsuccessful to date. Would you please call us at 519-885-0283 or email to ryan.b@renewability.com and confirm your contact info?

Thank you for your attention to this matter. We look forward to serving you when you call.

Sincerely,

Ryan Brueckner
Office Manager
RenewABILITY Energy Inc.

Exporting America

Mr. Weidmark ordered a Canadian-made Power-Pipe, he thought, but got a Doucette-made GFX from Canadian Intellectual Property (IP) Thieves engaged in Economic Espionage with Doucette Industries, Inc., York PA.

Figure 1. Power-Pipe lying on shipping carton from Canadian IP-Thieves

Figure 2. Blow-up of Doucette Label on Power-Pipe; no patent notice mandated by Article 8.1. Label reads: Model # GFX3-40

40" Long			
Total GST			28.86
Business Number: 86322 9720			
Total PST			32.98
Total			Can\$474.09

Power-Pipe™ Installation

- Installation Recommendations:**
- Vertical supply drain pipe into Power-Pipe unit to be at least 2 pipe diameters from any horizontal waste pipe.
 - Insulate pipes as desired to minimize heat loss, protect from freezing, or for sound deadening.
 - Insulate lower half of Power-Pipe unit to prevent condensation, as fresh water is still cool at this point.
 - To maximize performance, order and install the longest Power-Pipe unit that will fit into the drain system.
 - Power-Pipe unit must be installed vertically.

Exporting America - Robbing Canadians
Mr. Weidmark got ripped off too.
 Before Doucette began its criminal enterprise, he could have bought a G3-40 GFX online from the GFX Store for US\$180 (CDN\$222 on 6/9/04) + S/H, York PA (Free S/H in the US)
Instead he paid \$412.25 + \$61.84S/H from Waterloo, Ontario Canada = CDN\$474.09 to Canadian IP-thieves

Power-Pipe™ Drainwater Heat Recovery System

The Power-Pipe™ (formerly called GFX™) is an innovative technology that recycles a huge amount of heat from your warm drainwater. With the Power-Pipe™ you will save lots of money and help out the Environment!

The most common Power-Pipe™ unit typically saves \$180 per year in Canadian homes.

We can locate an installer for you. Please click [HERE](#) to inquire.

[How the GFX Works](#)

Power-Pipe™ Drainwater Heat Recovery System

Power-Pipe™ works on the principle of gravity film exchange, a principal that takes advantage of ultra-high heat transfer rates and the thermal-conductive properties of copper.

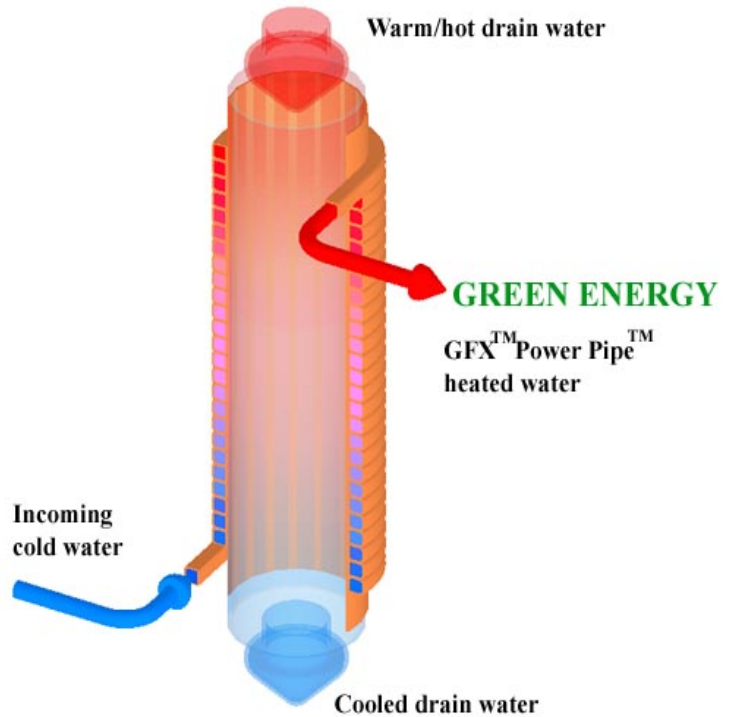

The Power-Pipe™ is an all-copper section of drainpipe. As water falls down a vertical section of drain pipe, it clings to the inner surface in a very thin film. The heat from this film is transferred easily and efficiently to the cold water circulating in the Power-Pipe™ around the outside of the drain pipe.

The incoming cold water is preheated before going into the water heater and plumbing fixtures thereby saving money and energy while increasing shower-capacity. The 60 inch unit can bring the cold water temperature up from 10 degrees C to as much as 24 degrees C in the wintertime.

Power-Pipe™ raises the temperature of incoming cold water by recycling free heat from waste water going down the drain. Approximately 80% to 90% of all hot water energy goes down the drain, allowing the Power-Pipe™ to recycle as much as 60% of the wasted heat. The more hot water you use, the more energy you save. This is especially beneficial in large process heating applications.

The Power-Pipe™ is completely passive, having no moving parts or heating elements so there's nothing to wear out, and the self-cleaning design assures maintenance-free operation. It will fit into almost any house, replacing a section of drainpipe in the basement.
